Design Engineer and Digital Solutions Builder with a B.Sc. in Computer Science, Product Management training, and hands-on experience at Wix Marketing. Combines UX/UI thinking, frontend implementation, CMS-based structures, and AI-oriented project experience to build polished, user-focused digital experiences from idea to execution.

Skills:

- **Digital Solutions & Product:** Digital Solution Design, Product Thinking, Requirements Gathering, Customer Journey Mapping, Feature Prioritization, Stakeholder Collaboration, User-Centered Design.
- **UX/UI & Web Experience:** UX/UI, Responsive Web Design, CMS-based Web Experiences, Figma, Wix Studio, Accessibility, SEO, Content Structure.
- **Technical Understanding:** JavaScript, React, HTML, CSS, REST APIs, Python, Flask, SQL.
Delivery: QA, Accessibility, SEO, Performance Optimization, Technical Implementation, Cross-functional Collaboration.

Experience:

Tech Designer / Design Engineer | Wix Marketing

Jul 2025 – Jun 2026

- Built responsive, CMS-driven web experiences for Wix Marketing using Wix Studio, custom code, frontend logic, and API integrations.
- Translated marketing and product briefs into scalable web solutions by combining UX/UI thinking, content architecture, CMS planning, and technical implementation.
- Created reusable CMS structures and content workflows to support dynamic content, improve consistency, and streamline web production across marketing pages.
- Contributed to end-to-end delivery of web pages and digital experiences, from implementation through final refinements before launch, with attention to responsive behavior, accessibility, SEO, and performance.

Leadership & Mentoring

2020 - 2026

Private Tutor

- Provided one-on-one tutoring, adapting learning methods to each student's needs, learning style, and pace while simplifying complex concepts and strengthening confidence, independent thinking, and problem-solving skills.

Mentor | Cracking the Glass Ceiling (Sodkoti) (2023 – 2025)

- Mentored high-school girls in a women-in-tech empowerment program, encouraging STEM confidence, curiosity, and long-term academic motivation.

Projects:

Hand Signs – Interactive ASL Learning Platform | AI & Computer Vision

- Developed an educational platform that supports American Sign Language (ASL) learning through real-time gesture recognition, computer vision, and speech/voice feedback.
- Translated a user need into an accessible learning experience for children and families, focusing on reducing communication barriers and supporting independent practice.
- Designed and implemented user-centered learning flows, including live sign detection, guided exercises, quizzes, feedback prompts, and performance tracking.
- Built a Flask-based web application integrating CNN models, OpenCV, and MediaPipe for real-time hand tracking and gesture recognition.
- Tech Stack: Python, Flask, TensorFlow, Keras, OpenCV, MediaPipe, JavaScript, HTML, CSS, NumPy, Pandas.

Education:

- **Product Management Certificate – Women in Tech Program** | Holon Institute of Technology (2025)
- **B.Sc. in Computer Science** | Holon Institute of Technology (2022 – 2025)

Achievements:

- **1st Place, CleanOno Innovation Competition** – served as Product Manager in a cross-functional team, leading the definition and delivery of a proof-of-concept smart city solution that translated resident and municipal needs into a mobile reporting app and an AI-powered web management system.
